

ARCTIC COLD WATER SEAFOOD

Russian Spot Shrimp

(PANDALUS HYP SINOTUS)

The Russian Spot Shrimp is distinguished by its mottled reddish-brown colour. It has white patches on its lower head and tail, along with a prominent ridge or hump on the head. With 17 to 21 spines running down the head and snout, the Russian Spot Shrimp is the largest of its kind. It can grow to lengths of up to seven inches (19 cm), excluding the antennae.

The Russian Spot Shrimp is delicately flavoured and ideal for barbecues and the grill.

ARCTIC COLD WATER SEAFOOD CAN ALSO PROVIDE:

Spiny Lebbeid Shrimp

(LEBBEUS GROENLANDICUS)
